## SURVEY OF PARTICIPANTS IN ESF-FUNDED ACTIVITIES, 2024

Personal questionnaire

Tallinn 2024

## About the survey

The aim of the European Social Fund (ESF) survey is to find out how participation in ESF-funded activities or the provision of support has influenced a person's situation in the labour market. The results of the survey are used to draw conclusions on the effectiveness of ESF activities.

Feedback is collected with a sample survey among persons who have participated in activities under ESF measures. The sample includes persons who have participated in one or more ESF-funded activities.

As a rule, respondents are sent a separate questionnaire with two or three questions concerning each specific activity or support. Depending on the type of activity, there may be fewer questions or a few additional questions about studying and participation in courses, entrepreneurship education, or promotion of adult education.

This document provides an overview of the questions that could potentially be asked about each activity.

| Question no. | Questionnaire   |  |  |  |  |  |  |  |  |  |  |
