

# Hea !

Statistics Estonia invites you to participate in the [ESTONIAN HEALTH INTERVIEW SURVEY](#) in order to assess the health status and health behaviour of our population.

- How good or bad is the health of Estonian people?
- How do behaviour and the environment affect our well-being?
- Which health care services do inhabitants of Estonia use the most?

A random sample of nearly 8,500 inhabitants of Estonia aged 15 or over will be interviewed. The data collected are essential for the state to make forecasts and to assess social coping and possible need for assistance.

As a token of our appreciation, we will draw five €50 Partner gift vouchers among all survey participants every month. The winners will be contacted.

**START FILLING IN THE QUESTIONNAIRE HERE!**

- You can respond to the survey **online** or **by phone**. In English, the questionnaire can only be filled in online.
- The questionnaire can be completed **online** between . **Only the person selected for the survey** can log in to the web environment using ID-card, Mobile-ID or Smart-ID.
- If you are unable to fill in the questionnaire online, you can also do so **by phone** between . An interviewer will contact you during this period. To ensure the quality of the data, the call will be recorded with the consent of the call recipient.
- Participation is voluntary. If you wish to opt out, please inform our customer support.
- If you wish, you can provide the customer support with your working telephone number and your preferred time for the interview.
- Information on the processing of personal data is available on Statistics Estonia's website in the section "[Data protection](#)", more information on the survey can be found under "[Personal surveys](#)".

Yours sincerely,
